SUMMARY

Computer Science undergraduate specializing in full-stack development with the MERN stack. Built and deployed production-ready applications featuring JWT authentication, RESTful API design, and third-party integrations (Cloudinary, Socket.IO, Google Perspective API). Solved 200+ Data Structures & Algorithms problems and consistently apply strong CS fundamentals to write scalable, maintainable code.

EDUCATION

Greater Noida Institute of Technology

Bachelor of Technology in Computer Science and Engineering **CGPA: 8.4/10**

Greater Noida, India

2023 – 2027

TECHNICAL SKILLS

Languages: C++, JavaScript, SQL

Frontend: React.js, Vite, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman, Cloudinary, VS Code, Vercel, Render

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, RESTful APIs, JWT Authentication

PROJECTS

BioArchive — Full-Stack Blogging Platform | [Live](#) | [GitHub](#)

- Engineered a full-stack blogging platform (React.js, Node.js, Express.js, MongoDB) supporting rich-text editing, dark mode, search, bookmarks, comments, and reading history.
- Implemented JWT-based authentication with role-based access control (RBAC) to secure user and admin routes.
- Designed RESTful APIs with Express.js and MongoDB for authentication, blog management, user profiles, and comments.
- Integrated Cloudinary for optimized cloud-based image uploads and delivery; deployed the frontend on Vercel and backend on Render.

SafeChat — AI-Powered Cyberbullying Detection Platform | [Live](#) | [GitHub](#)

- Built a real-time chat application (React.js, Node.js, Express.js, MongoDB, Socket.IO) enabling instant, low-latency bidirectional messaging.
- Integrated Google's Perspective API to automatically detect toxic or harmful messages and provide AI-powered content moderation in real time.
- Implemented JWT authentication and role-based authorization to secure user access and prevent unauthorized entry into chat rooms.
- Designed scalable RESTful APIs and optimized Socket.IO event handling to reduce message round-trip time under concurrent connections.

ACHIEVEMENTS

- Solved **300+** Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
- Participated in the **Techclasher Hackathon 2025** organized by GNIOT.
- Maintained a **CGPA of 8.4/10** in B.Tech (Computer Science & Engineering).

CERTIFICATIONS

- NPTEL – Data Structures
- IIT Kanpur – C Programming
