SUMMARY

Computer Science undergraduate with hands-on experience building and deploying full-stack web applications using the MERN stack. Proficient in React.js, Node.js, Express.js, and MongoDB, with experience designing RESTful APIs, implementing JWT authentication, integrating Cloudinary, and deploying applications on Vercel and Render. Strong foundation in Data Structures & Algorithms with a passion for building scalable software solutions.

EDUCATION

Greater Noida Institute of Technology

*Bachelor of Technology in Computer Science and Engineering **CGPA: 8.4/10***

Greater Noida, India

2023 – 2027

TECHNICAL SKILLS

Languages: C++, JavaScript, SQL

Frontend: React.js, Vite, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js

Databases: MongoDB Atlas, MySQL

Tools: Git, GitHub, Postman, Cloudinary, VS Code, Vercel, Render

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, RESTful APIs, JWT Authentication

PROJECTS

BioArchive — Full-Stack Blogging Platform | [Live](#) | [GitHub](#)

- Built using React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB Atlas, Cloudinary, and JWT Authentication
- Developed a production-ready full-stack blogging platform with secure JWT authentication and role-based access control.
- Designed responsive user interfaces featuring rich text editing, dark mode, search, bookmarks, comments, and reading history.
- Built RESTful APIs with Express.js and MongoDB Atlas for authentication, blog management, user profiles, and comments.
- Integrated Cloudinary for cloud-based image uploads and deployed the frontend on Vercel and backend on Render.

SafeChat — AI-Powered Cyberbullying Detection Platform | [Live](#) | [GitHub](#)

- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Socket.IO, Google Perspective API, JWT Authentication.
- Developed a real-time MERN-based chat application enabling instant messaging using Socket.IO.
- Integrated Google Perspective API to detect toxic messages and provide AI-powered content moderation.
- Implemented JWT authentication and role-based authorization to ensure secure user access.
- Designed scalable RESTful APIs and optimized low-latency communication between clients and the server.

ACHIEVEMENTS

- Solved **200+** Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
- Participated in the **Techclasher Hackathon 2025** organized by GNIOT.
- Maintained a **CGPA of 8.4/10** in B.Tech (Computer Science & Engineering).

CERTIFICATIONS

- NPTEL – Data Structures
- IIT Kanpur – C Programming
